Ok thanks.

By the way, we will be having a CAC meeting on February 13th since the Electron-Ion Collider was announced. We will also be providing brief updates on several environmental issues including Five Year Review, private well testing, stack demo, and mention that the State report (regarding other sources of PFAS) was made available.

We have a call into Brian to see if he can make it also.

Are you available?

Bob

Bob,
Thank you. I haven't found one but if I do track it down, I will send it your way.
Sharon

Sharon,
Attached is a pdf of the Startup Report but I couldn't find the tables or appendices electronically. Responses to EPA comments/questions received 10/20/04 were submitted to EPA 12/2/04. As far as I can see, EPA never sent final approval letter. If you find a copy, please send it to me.
Thanks Bob

Thank you! Yes, this is the correct OU. An electronic copy of the report would be great. And do you also happen to have a copy of our approval letter back to you on the report? I'm sure I can find a copy somewhere but if you have it easily on hand – I am still getting up to speed with the older files.
Thanks,
Sharon

Subject: RE: Seeking BNL document for EDB plume

Sharon,

I assume you are interested in the Operable Unit VI EDB plume, correct? Attached is the cover letter from DOE to the regulators transmitting the Startup and Pump Test Report for the OU VI EDB System (dated 9/28/04). If you need an electronic copy of the report, please let me know.

If you are talking about the Operable Unit III North Street East EDB plume, we should be finishing construction in the near future, followed by startup testing and full scale operation.

If I can be of further assistance, please let me know.

Thanks Bob

Subject: Seeking BNL document for EDB plume

Hi Bob,

We are updating dates in our tracking system for BNL operable units, and I am looking for documentation of when the construction on the EDB plume treatment system was completed. I've been through what we have on hand here, and haven't been able to locate a file that fits the need. This could be either a construction completion report, or an interim report that documents the remedy is operational and functional.

If you have anything available for documentation that would be very helpful! I'll continue to look here in the meantime.

Thanks,

Sharon
